Singing

ABOUT ME

Having many previous experiences abroad throughout my life has allowed me to become independent and a responsible individual who is keen to gain more knowledge by inheriting more within the theatre culture and looking to expand in this field every day. I worked in places which require good communication with the rest of the team. As I have completed my degree in Turkey, I am keen to study and work international arena which will also help me with projects with my own theatre company in the future. I have also received six MA offers from three different countries. (Lassaad in Belgium, The Commedia School in Denmark, Manchester Metropolitan University (contemporary performance), University of Kent (physical acting), Middlesex University (theatre arts), and Arts Ed (acting) in the UK.) However, I did not have an economic situation or a family that can pay the fees of the schools, so I have expected support from institutions and people who support education. Time was short due to the schools was opening in September 2020. However, I could not find scholarship in Turkey because of COVID 19.
